

PRINTER:	
Web width	3.15" - 9.45" (80 - 240 mm)
Print speed	29.5' or 59' / minute (9 or 18 m / minute)
Print resolution	1,600 x 1,600 dpi
CMYK	2 liter ink tanks
Power supply	110-240V / 2560W
Dimensions	6.56' x 4.59' x 3.28' (2,000 x 1,400 x 1,000 mm)
Weight	1,102.31 lbs. (500 kg)
Webguide	Model: Eco Guide BST - BST Web Edge Guiding system 2 with ultrasonic edge sensor
Media	Media width: 2" - 9.5" (80.8 mm - 240 mm) Maximum print width: 8.77" (222 mm) Media thickness: 4 pt / ml to 12 pt / ml (0.1 - 0.3 mm)
Operation environment	Operation: 20°C / 68°F to 30°C / 86°F (25°C / 77°F recommended) Humidity: 22 to 80% RH (non-condensing)
Winders	Max. roll size: 19.69" (500 mm) and max. core size: 3" (76 mm)
Platform	Double-sided frame for printing section; superior stiffness and reliability Unwinder and rewinder for easy access Optical print mark/label sensor with adjustable position Splice table with magnet clamps Large service door and easy ink tank access
Interface	Unique and user-friendly software

FINISHER:	
Web width	3.18" - 9.45" (80.8 - 240 mm)
Cutting speed	29.5' or 59' / minute (9 or 18 m / minute)
Power supply	110-240V / 2880W
Dimensions	9.52' x 5.36' x 3.47' (2,901 x 1,634 x 1,058 mm)
Weight	2,645.55 lbs. (1,200 kg)
Operation environment	Operation: 20°C / 68°F to 30°C / 86°F (25°C / 77°F recommended) Humidity: 22 to 80% RH (non-condensing)
Finishing specs	Die cutter technology: semi-rotary magnetic cylinder Digital cutting plotter Cold lamination Slitting and waste removal

HIGH PRODUCTION

Digital Label Press and Finishing System

THE ONLY LIMIT IS YOUR IMAGINATION

PLS-875i + **PLS-875f**
Digital Label Press Digital Finishing System

Muratec's **PLS-875i** is a high-speed digital label press that prints a continuous roll or pre die-cut media, up to 9.5" wide, on a variety of substrates. This system features easy-to-use print software that guides users step-by-step through job set up and execution.

Professional print shops and label converters benefit from Muratec's PLS-875i digital label press by taking on jobs that previously would not be feasible or profitable on an analog press; specifically, short-run jobs that include variable data, sizes and colors.

Businesses who rely on labels use Muratec's PLS-875i to bring label printing in-house and significantly reduce their label spend, waste and production time. Imagine, instead of waiting weeks to receive your labels, you can print, laminate, die-cut and have them ready for application in just hours.

Muratec's PLS-875i digital press can also have a dramatic cash flow effect, not only by saving potentially thousands of dollars per year in reduced label costs, but also by freeing up cash typically absorbed by label inventory that may get discarded. The PLS-875i gives you the ability to:

- Instantly give your logo, packaging and brand a completely new look.
- Print 500 labels, instead of 500,000, saving money, reducing waste and eliminating an inventory nightmare.
- Control label production and timing in-house, preventing label-related shipment delays.

So go ahead. Let your imagination run wild. With Muratec's PLS-875i digital label press, your brand comes to life. Separate yourself from the competition and create a higher perceived product value, all while dramatically lowering your actual label production cost.

With Muratec's PLS-875i, prime labels can be produced on a variety of substrates including pre die-cut labels, inkjet coated face stocks, paper, synthetics, adhesive backed, foils and more. This type of flexibility is perfect for creating:

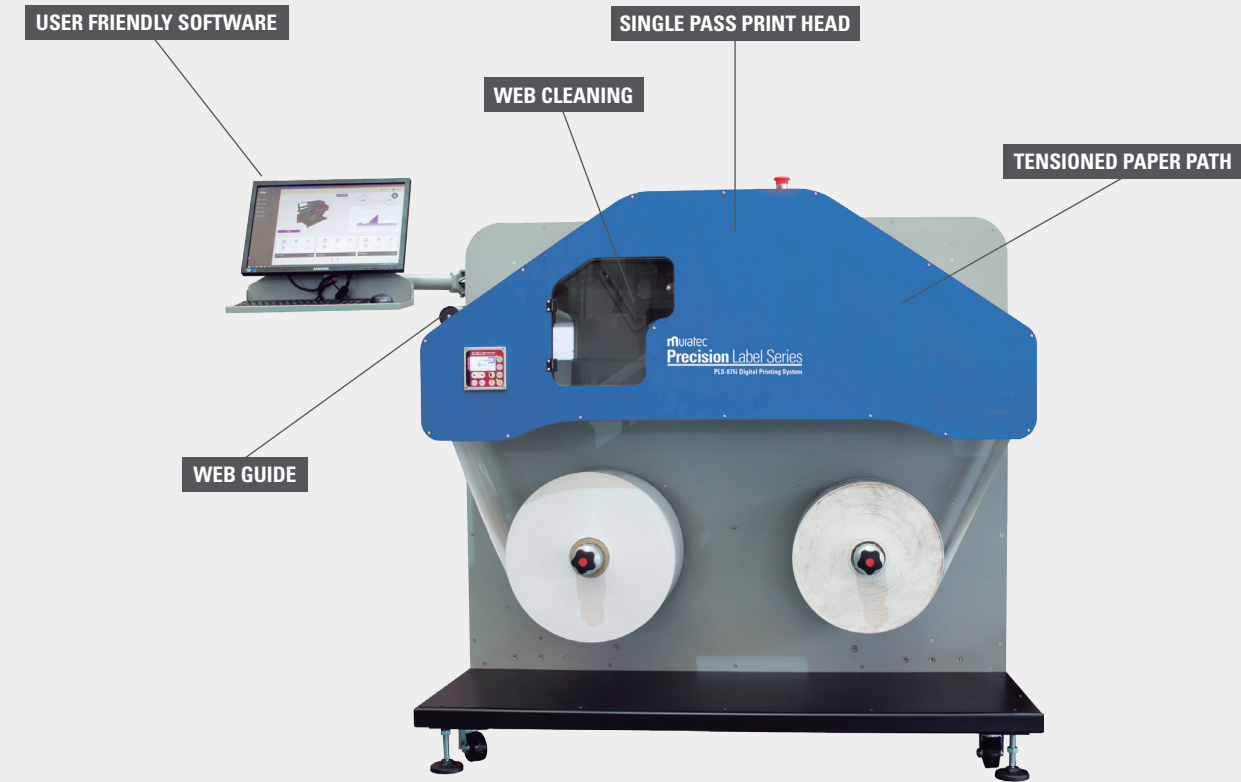

- Food and beverage labels
- Healthcare and pharmaceutical products
- Industrial chemicals
- GHS and safety information
- Corporate branding and promotional items
- Parking permits, school spirit materials

By adding Muratec's **PLS-875f** digital in-line finishing system, you'll get application-ready labels faster and easier than ever before. The PLS-875f uses a semi-rotary magnetic die cylinder, which allows labels to simultaneously print and die-cut at speeds up to 59 feet per minute. Printing samples or small quantities? No problem. The PLS-875f also has a cutting plotter for those one-off jobs.
